DOCUMENT RESUME

ED 368 233 HE 027 128

TITLE	Annual Summary Report of Degrees Granted by Arkansas Institutions of Higher Education, 1987-88.
INSTITUTION	Arkansas State Dept. of Higher Education, Little Rock.
PUB DATE	Jul 89
NOTE	173p.; For 1988-1991 reports, see HE 027 129-131.
PUB TYPE	Statistical Data (110)
EDRS PRICE	MF01/PC07 Plus Postage.
DESCRIPTORS	Associate Degrees; Bachelors Degrees; Black Students; *Degrees (Academic); Doctoral Degrees; *Educational Trends; Higher Education; Intellectual Disciplines; Majors (Students); Masters Degrees; Minority Groups; Private Colleges; State Colleges; Tables (Data); Two Year Colleges
IDENTIFIERS	*Arkansas

ABSTRACT

This document offers a summary report of degrees granted at Arkansas state and independent higher education institutions for 1987-88 and highlights trends over a 5 year period. A summary section notes that total degrees conferred numbered 11,443, an increase of 221 from the previous year. The increase was caused by an increase in baccalaureate degrees granted at public institutions. Business and management and education were the most productive disciplines at the bachelors level and education accounted for 50.5 percent of all Masters degrees. Doctoral degrees in agriculture have dropped 64 percent in 3 years and education and physical sciences were the two fields producing the most doctoral degrees. Of first professional degrees 369 were conferred, an increase of nearly 16 percent from the previous year. Among degrees granted, 10.5 percent were awarded to Black students, an increase of 2.2 percent from 1986-87 but a decease of 13.2 percent from a decade ago. Most of the report presents the detailed supporting data in two appendixes. Appendix A list degrees granted by public institutions 1983-84 to 1987-88 and degrees granted by independent institutions in the same period. Appendix B contains tables showing degrees and awards conferred in 1987-88 by two-year institutions, degrees granted by four-year state institutions, and degrees granted by independent institutions in 1987-88. Appendixes C and D provide a glossary and list of institutional names and abbreviations. (JB)

1. Includes degrees granted by UAF in Operations Management at Military Bases and in Instrumentation Science at UALR.
2. Does not include UAMS House Officer (Post-MD) degrees or post-baccalaureate Dietetic Internships at UAMS.
3. Includes degrees granted by UAF in Life Sciences through UAMS.

ANNUAL SUMMARY OF COMPLETIONS

ANNUAL SUMMARY OF COMPLETIONS:
DEGREES GRANTED AND OTHER FORMAL AWARDS
CONFERRED BY ARKANSAS COLLEGES AND UNIVERSITIES
1987-88

Arkansas public and independent colleges and universities conferred 11,443 degrees and other formal awards in 1987-88. This represents an increase of 221 awards from the total for 1986-87, caused mainly by an upswing in the number of baccalaureate degrees granted by public institutions. Figure 1 illustrates the trend in degrees and awards at all Arkansas institutions of higher education since 1983-84.

Table 14 summarizes the 1987-88 data on completions (degrees and other awards) for Arkansas higher education by degree type for the public and independent institutions of higher education. Over 85% of all awards in Arkansas are made by the public colleges and universities, including all doctorates and first-professional degrees (law and medicine) and all but 3 certificates. The independent sector is particularly strong at the baccalaureate level: 84% of the awards made in 1987-88 by the state's twelve independent colleges and universities were bachelor's degrees.

This report on higher education completions examines a number of trends in degree-granting, with particular emphasis on public higher education. Five-year trends are illustrated, including the most productive academic disciplines at each degree level. In addition, comparisons are made between Arkansas and the nation as a whole with respect to degree-granting activity in a number of discipline areas.

TABLE 14. ANNUAL SUMMARY OF COMPLETIONS: DEGREES GRANTED AND OTHER FORMAL AWARDS CONFERRED BY ARKANSAS COLLEGES AND UNIVERSITIES, 1987-88

Degree or Award	Public	Independent	Total
Certificates	173	3	176
Associate Degrees	1,591	159	1,750
Bachelor's Degrees	5,636	1,379	7,015
Post-Baccalaureate Certificates	14	-	14
Master's and Specialist Degrees	1,717	101	1,818
Doctoral Degrees	101	-	101
First-Professional Degrees	369	-	369
Post First-Professional Degrees	200	-	200
Totals	9,801	1,642	11,443

FIVE-YEAR TREND
AT ARKANSAS PUBLIC COLLEGES AND UNIVERSITIES

The state's public colleges and universities conferred 9,801 degrees and other formal awards in 1987-88. This total was 182 awards higher than the 1986-87 figure and slightly lower than the total for 1983-84. As discussed below in more detail, declines took place in associate, master's, and doctoral degrees. On the other hand, the 20 public institutions graduated more students in 1987-88 with certificates, baccalaureate, specialist, first-professional, and post first-professional degrees than in the previous year. Figure 2 depicts the five-year trend for all awards; the pattern at each degree level is discussed separately in the following pages.

1. Associate Degrees

Associate degrees granted by Arkansas public colleges and universities totaled 1,591 in 1987-88, a modest decrease over the previous year. Viewed in a five-year context, as illustrated by Figure 3, the number of associate degrees has remained fairly constant with the highest number being awarded in 1984-85.

When associate degree production is viewed in terms of awards in particular disciplines, there is a remarkable pattern of stability. As Table 15 indicates, Liberal and General Studies, Health Sciences, and Business and Management are the most popular fields for students who receive associate degrees. This has been the case for the past three years, and these disciplines account for over 70% of the total number of associate degrees obtained at the state's public institutions of higher education. Trailing these areas as the most productive associate degree fields are Marketing and Distribution, Engineering and Engineering-Related Technology, and Allied Health. The top five discipline codes as a group encompass over 85% of the associate degrees awarded in public colleges and universities since 1985-86.

TABLE 15. ACADEMIC DISCIPLINES WITH LARGEST NUMBER OF ASSOCIATE DEGREES, ARKANSAS PUBLIC FOUR- AND TWO-YEAR INSTITUTIONS, 1985-86 THROUGH 1987-88

		1985-86			1986-87			1987-88

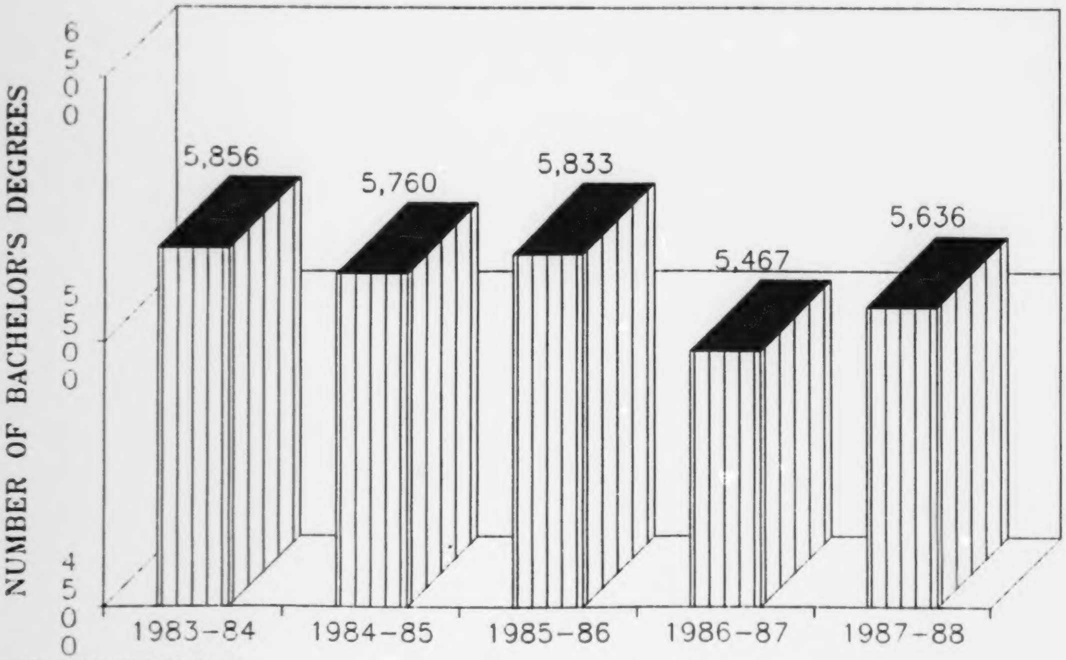
FIGURE 4. BACHELOR'S DEGREES GRANTED BY ARKANSAS PUBLIC INSTITUTIONS, 1983-84 THROUGH 1987-88



SOURCE: HEGIS AND IPEDS FORMS

2. Baccalaureate Degrees

Bachelor's degrees were awarded to 5,636 students at Arkansas public colleges and universities in 1987-88. The number of new baccalaureate graduates in this period represents a 3.1% productivity increase over the previous year and a decline of 3.8% since 1983-84. Figure 4 shows the trend over this five-year period.

The majority of the state's four-year institutions experienced an increase in baccalaureate awards in 1987-88 in comparison to the previous year. Disciplines with a notable rise in productivity include: Business and Management with a 6.4% increase; Education, which rose by 7.6%; and Health Sciences, where 10.3% more bachelor's degrees were granted.

Tables 10 and 16 show a downward trend over the last three years for both Engineering and Computer Science. Bachelor's degrees in Engineering have declined by 17.4% since 1985-86, while those in Computer Science are down by 25.6% in the same period. National trends in these disciplines are discussed later in this report.

The data in Table 16 identify the most popular and productive disciplines for baccalaureate awards. Business and Management, with over one-fourth of all public bachelor's degrees, and Education, with just over 20%, have headed the list for three straight years. Nationally, Business and Management is the largest category for bachelor's degrees as well, but Education has fallen behind Social Sciences as the next most popular field according to the Digest of Education Statistics, a publication produced by the National Center for Education Statistics in 1988. In Arkansas, however, Social Sciences is not one of the five most productive disciplines for bachelor's degree awards.

It was noted earlier that the top five associate degree disciplines account for over 85% of all Arkansas public institution associate degrees. There is less degree-seeking consensus among students who obtain the bachelor's degree; the five most productive disciplines account for less than two-thirds of all baccalaureate awards. This broader range of student choices helps us to explain the diversity of programs and academic concentrations at the four-year institutions of higher education.

TABLE 16. ACADEMIC DISCIPLINES WITH LARGEST NUMBER OF BACHELOR'S DEGREES, ARKANSAS PUBLIC FOUR-YEAR INSTITUTIONS, 1985-86 THROUGH 1987-88

		1985-86			1986-87			1987-88

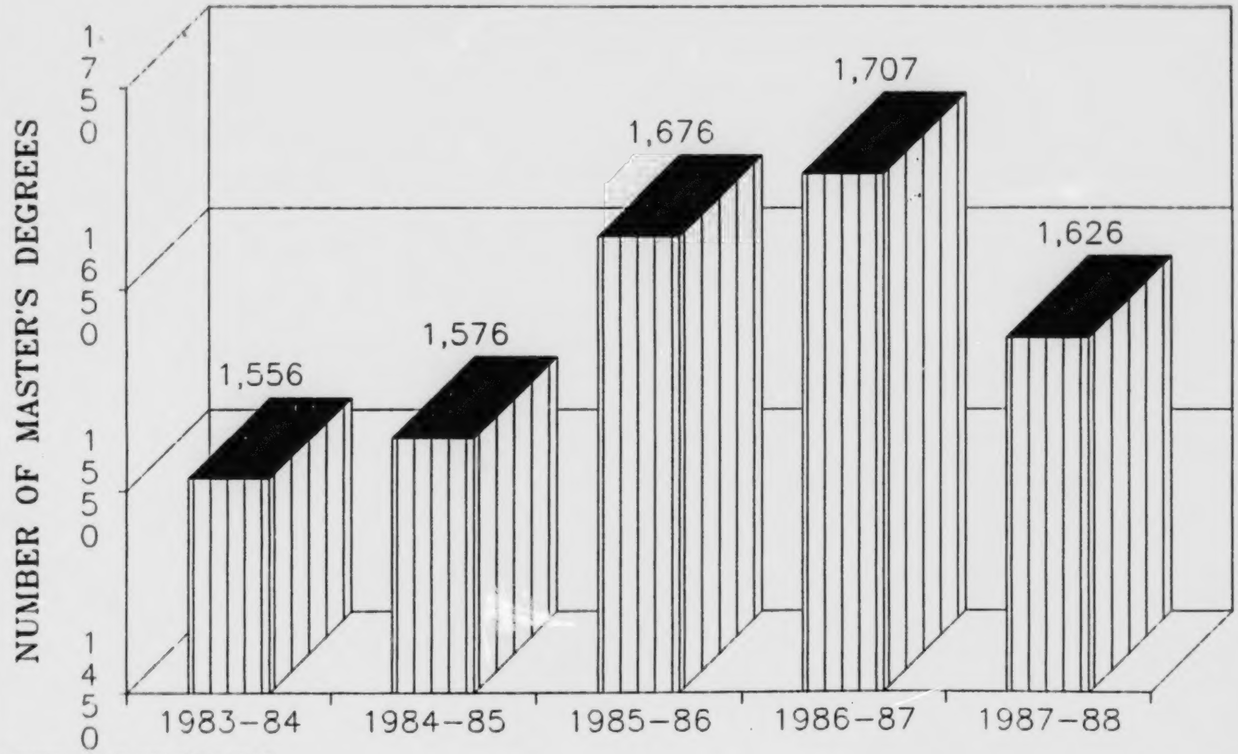
FIGURE 5. MASTER'S DEGREES GRANTED BY ARKANSAS PUBLIC INSTITUTIONS, 1983-84 THROUGH 1987-88



SOURCE: HEGIS AND IPEDS FORMS

3. Master's Degrees

Master's degrees were earned by 1,626 students at the the state's public colleges and universities in 1987-88 (see Figure 5). After increasing steadily for the past four years this represents a decrease of nearly 5.0% over the previous year. However, seven of the eight public universities offering the master's degree have seen an increase in degree recipients since 1983-84. In recent years, the consistent growth area at the master's degree level in Arkansas has been in Education. Since 1985-86, awards by the state's public institutions have gone from 785 to 821, an increase of 4.6%. Although Engineering continues to rank second, the number of master's degrees has declined steadily for the last three years as shown in Table 17.

Education degrees account for 50.5% of all master's degrees in Arkansas, making this discipline area the largest source of master's degree graduates. In fact, at several Arkansas public universities, all graduate degrees granted are in the field of Education. Similarly, the latest national data available shows that Education is also the largest field of study for the master's degree. Over one-quarter of all master's degrees conferred in this country are in Education.

The master's level discipline areas generating the largest number of degrees are reported in Table 17. In addition to Education, which maintains a commanding lead in the number of awards at this degree level, the largest fields of study are Engineering, Business and Management, Health Sciences and Public Affairs (e.g., public administration, public policy studies and social work). These five areas have remained the most popular fields of study with students at the master's level for the past three years. Almost 80% of all master's degrees awarded by the public universities are in one of these disciplines.

This represents a more concentrated pattern of degree-seeking activity than that which exists at the baccalaureate level. The most likely explanation is that most students who pursue a master's degree in Arkansas do so for reasons closely related to specific career objectives. In some other states where Education degrees represent a smaller proportion of the total and where the state's economy is more diverse, a greater percentage of students obtain the master's either in non-education fields or as part of a program of study leading to the doctorate.

TABLE 17. ACADEMIC DISCIPLINES WITH LARGEST NUMBER OF MASTER'S DEGREES, ARKANSAS PUBLIC FOUR-YEAR INSTITUTIONS, 1985-86 THROUGH 1987-88

		1985-86			1986-87			1987-88

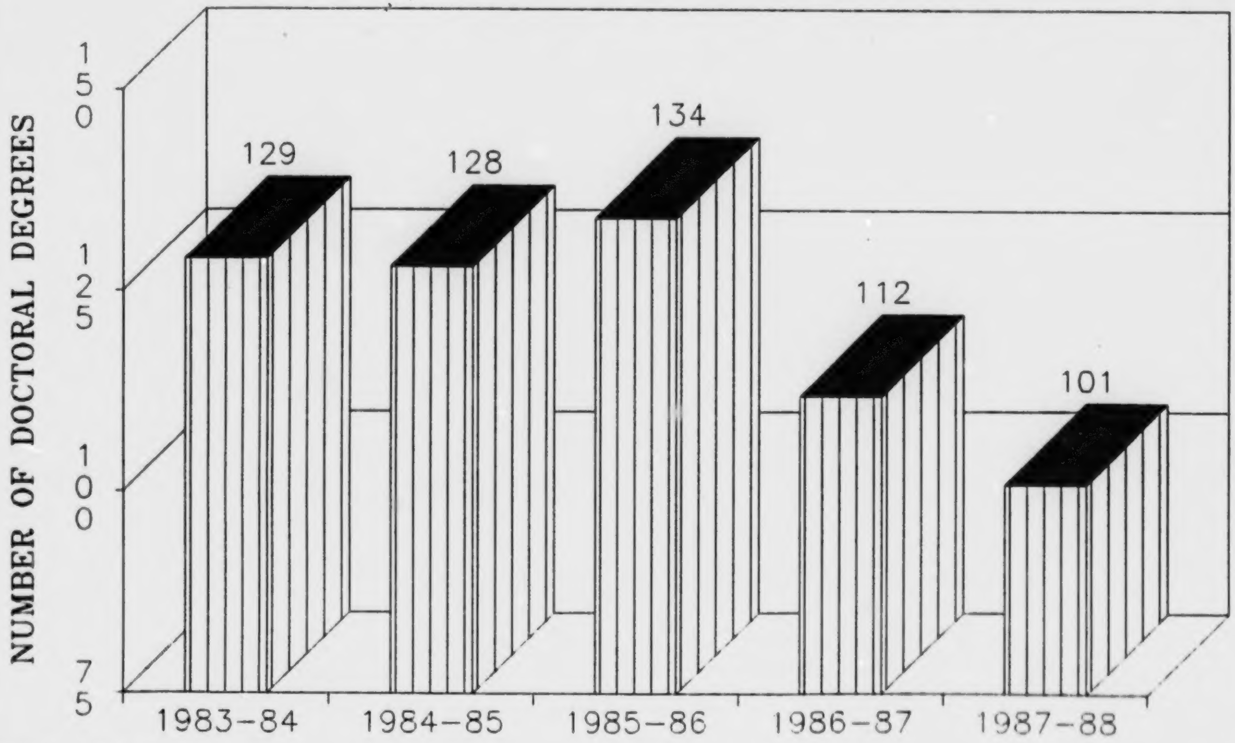
FIGURE 6. DOCTORAL DEGREES GRANTED BY ARKANSAS PUBLIC INSTITUTIONS, 1983-84 THROUGH 1987-88



SOURCE: HEGIS AND IPEDS FORMS

4. Doctoral Degrees

The University of Arkansas, Fayetteville, granted 101 doctoral degrees in 1987-88, which represents a decline of 28 degrees from 1983-84. UAF is the only doctoral-granting university in the state; however, six of its 101 doctorates were in programs offered on the UAMS campus. Figure 6 indicates that 21.7% fewer doctoral degrees were awarded last year than was the case in 1983-84.

As in previous years, Education was the field of study attracting the largest number of degree recipients (31.68%) in 1987-88. Traditionally, Education has been the academic discipline garnering the largest number of doctorates. At the national level, that is also true. Over one-fifth of all doctorates awarded in the United State were in education in 1985-86.

The data in Table 18 also show that six discipline areas accounted for 84% of all Arkansas doctoral degrees in 1987-88. For the past three years, this has been a fairly consistent pattern, but the variation in rank has been marked. In the past two years, the number of doctorates in Physical Sciences has increased enough to move this discipline into second place. Doctorates in Agricultural Sciences have dropped by 64% in three years, putting this field in fourth place. Although Engineering was not among the top five disciplines last year, it tied with Life Sciences for fifth place this year.

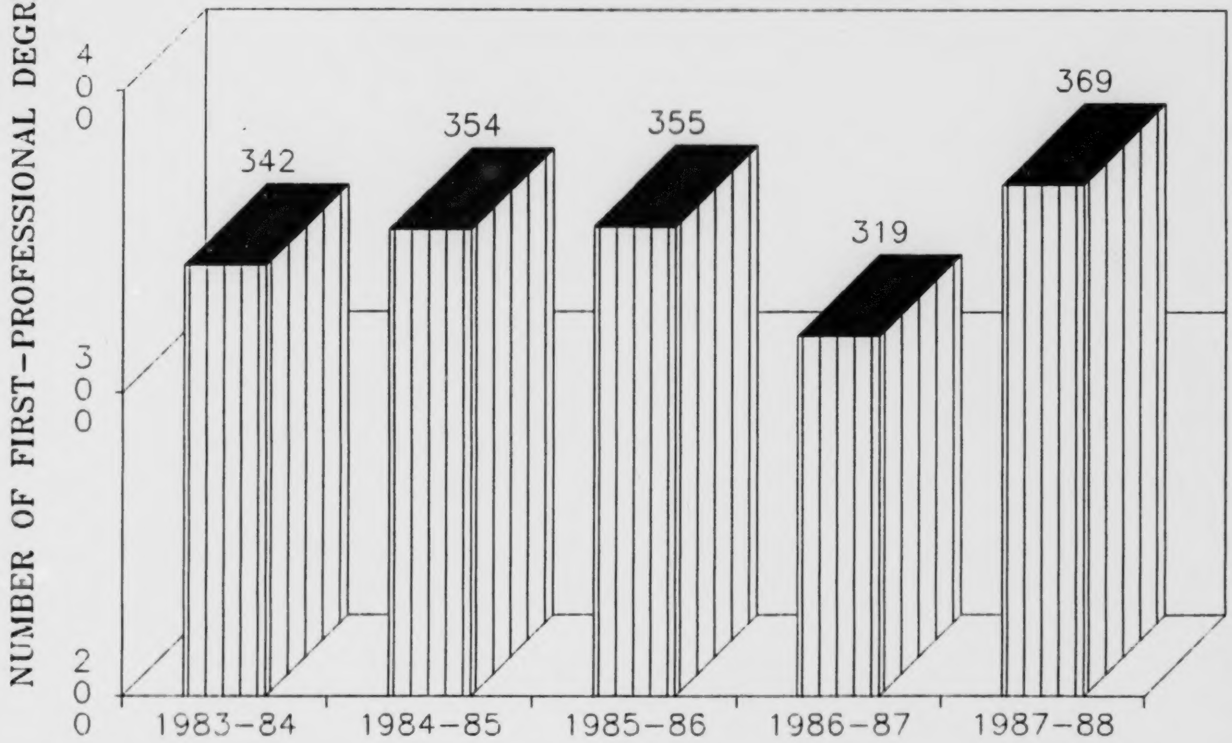
FIGURE 7. FIRST-PROFESSIONAL DEGREES GRANTED BY ARKANSAS PUBLIC INSTITUTIONS, 1983-84 THROUGH 1987-88



SOURCE: HEGIS AND IPEDS FORMS

5. First Professional Degrees

Three of the state's public universities conferred 369 first professional degrees in 1987-88, an increase of nearly 16% from 1986-87. Medical school graduates at UAMS numbered 122, and law school graduates increased at both UAF to 135 and at UALR to 112. UAF experienced a 21.6% rise in law degrees, while the increase at UALR was almost 35% from the previous year.

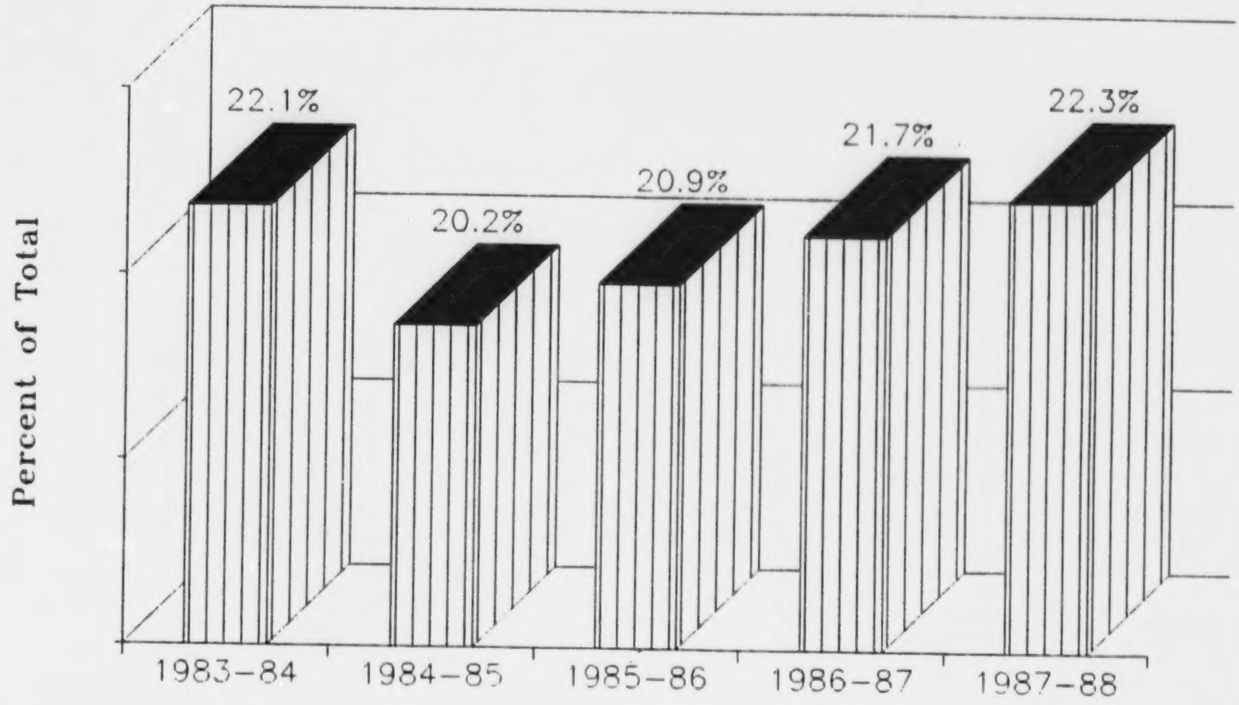
Overall, the five-year trend in Figure 7 shows almost 8% growth in first professional degrees since 1983-84. This gain can be attributed to the increase in law degrees, which grew by 17.6% Both law schools granted more degrees: there were 247 in 1987-88 and 210 in 1983-84. At Fayetteville, the change was 19 more degrees, or 16.4%, while UALR experienced an increase of 18 degrees, or 19.1%.

This five-year trend runs counter to the national experience, where law degrees declined by more than one thousand between 1983-84 and 1985-86, the latest year for which data are available. For medicine, Arkansas' experience with medical school graduates is similar to the national trend, which seems to indicate that medical school enrollment has peaked nationally.

Summary

As the data in these pages indicate, degree-granting activity continues to increase at Arkansas' institutions of higher education. The 20 public colleges and universities alone conferred over 9,500 degrees in 1987-88. The state's economic future can only be more promising as a result of new graduates entering the workforce and as more of its populace return to the classroom to enhance their training and skills.

FIGURE 8. BACHELOR'S DEGREES IN EDUCATION AS A % OF BACHELOR'S DEGREES IN ARK. HIGHER EDUCATION, 1984-88



Source: ADHE and IPEDS Reports

DEGREES GRANTED IN EDUCATION AT ARKANSAS COLLEGES AND UNIVERSITIES

On the basis of degrees granted each year, the academic discipline of Education is the largest field of study in Arkansas higher education. In 1987-88, 27.8% of all degrees awarded at or above the bachelor's level were in Education. The table in this section provides a breakdown of Education degrees at all levels over the past five years.

TABLE 19. EDUCATION DEGREES GRANTED BY ARKANSAS COLLEGES AND UNIVERSITIES

	1983-84	1984-85	1985-86	1986-87	1987-88
Bachelor's	1,645	1,446	1,525	1,494	1,565
Master's	744	792	849	915	900
Doctoral	36	41	30	33	32

The importance of Education as a field of study goes beyond degree productivity at the 32 colleges and universities in Arkansas. The state's public school standards, increased attention on precollegiate preparation by high school students, and various studies of teacher education programs by state and national groups all serve to underscore the central role of this discipline. Recent trends in degree-granting activity in the field of Education are discussed in this section. The analysis of these general patterns is followed by a review of the proportion of Education baccalaureate degrees awarded to black students in Arkansas.

1. Bachelor's Degrees in Education

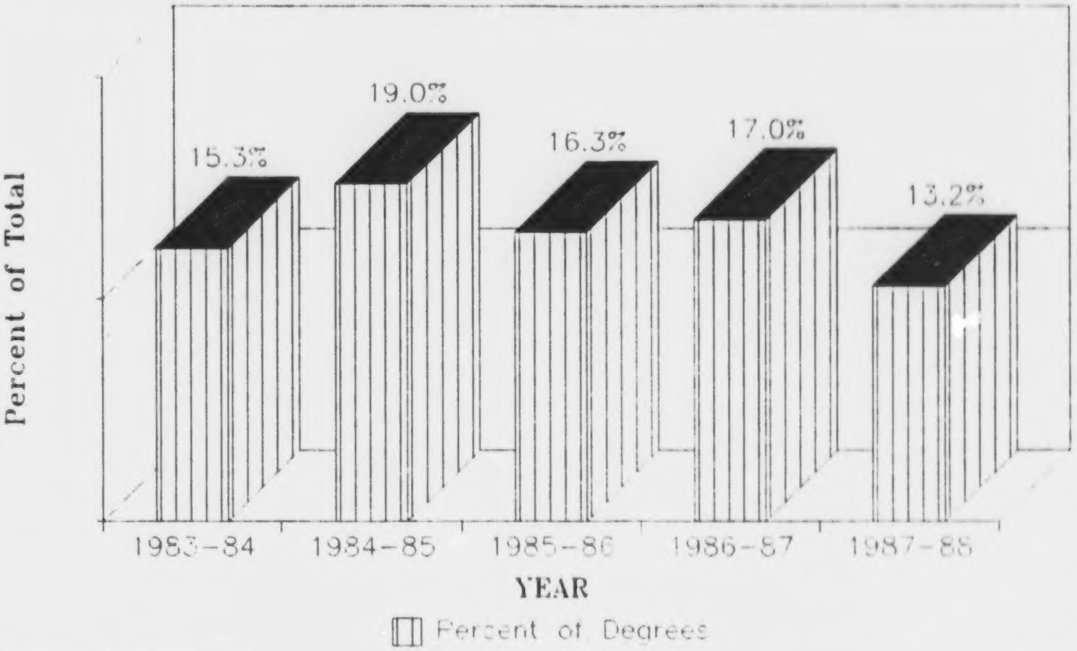
The chart in Figure 8 shows that 22% of all bachelor's degrees granted in Arkansas in 1987-88 were awarded in Education. These degrees were awarded by nine public universities and seven independent institutions. Since 1983-84, the number of Education bachelor's degrees has declined by 80, but the relative size of this field has not changed very much.

2. Bachelor's Degrees in Physical Education

Implementation of the Arkansas public school standards has created demand for teachers trained in such fields as mathematics, foreign languages and the sciences. Meeting this demand is an issue for school boards, administrators and colleges of education. It is in this context that concern has been expressed on occasion about the number of physical education graduates from Arkansas teacher education programs.

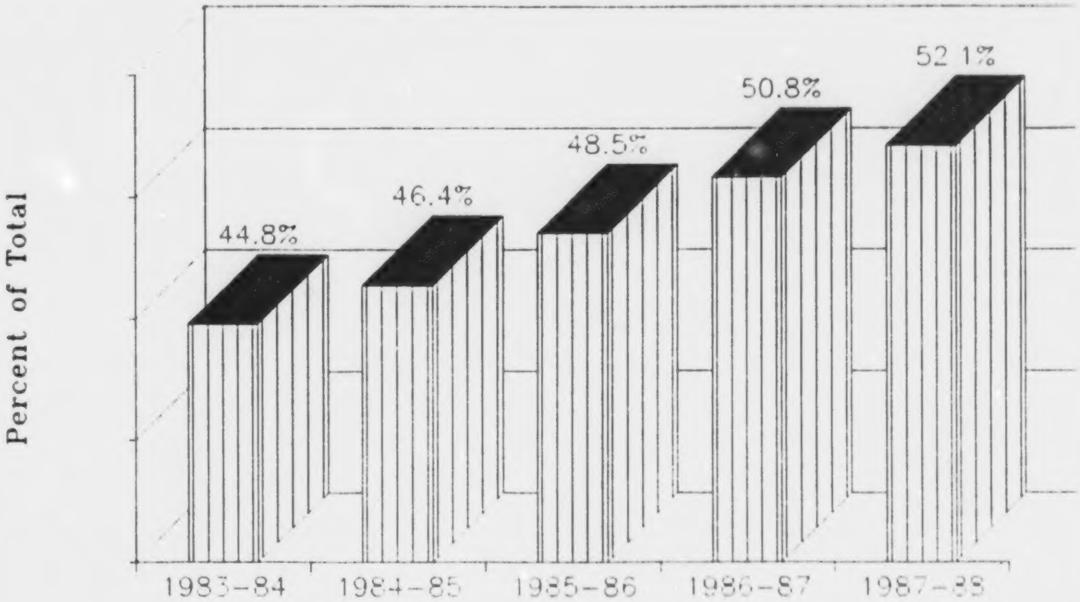
Over the past five years, the most popular fields of study for teacher education students in Arkansas have been elementary education and physical education. In each year since 1983, the number of physical education majors is exceeded only by those earning degrees in elementary education. For the nine public sector teacher education programs, the proportion of physical education graduates has ranged from 19% in 1984-85 to 13% in 1987-88.

FIGURE 9. BACHELOR'S DEGREES IN PHYSICAL EDUCATION AS % OF BACHELOR'S DEGREES IN TEACHER EDUCATION AT PUBLIC UNIVERSITIES



SOURCE: HEGIS AND IPEDS FORMS

FIGURE 10. MASTER'S DEGREES AWARDED IN EDUCATION AS A PCT. OF TOTAL MASTER'S DEGREES IN ARK. HIGHER EDUCATION 1984-88



Source: ADHE and IPEDS Reports

The accompanying graph depicts the trend since 1983-84 when the 204 bachelor's degrees awarded in physical education represented 15% of the total. Last year, 173 graduates earned baccalaureate degrees in physical education, 13% of the total. By way of comparison, 18 graduates earned degrees in foreign languages education and 45 awards were made in mathematics education.

The same broad pattern exists at the Arkansas independent institutions. In 1983-84, 22.5% of all education bachelor's degrees from these programs were in physical education, as were 20.2% in 1987-88. Throughout the five-year period since 1983-84, physical education has been second to elementary education in total education bachelor's degrees. This is the same relative order noted earlier at the public universities. Last year, Arkansas independent institutions graduated seven students with degrees in math education and none in foreign languages education.

3. Master's Degrees in Education

A majority of all students who receive the master's degree in Arkansas obtain their degree in Education. Table 19 shows that the number of awards peaked last year at 915 and declined slightly in 1987-88. Nonetheless, Education master's degrees have increased by more than 150 since 1983-84. The 900 awards in 1987-88 represent 52% of all Arkansas master's degrees, and Figure 10 illustrates this trend over the last five years.

4. Doctoral Awards in Education

Arkansas has one institution which grants doctoral degrees in Education. In recent years, the number of Education awards has fluctuated slightly but the 33 doctorates granted in 1987-88 was a change of just one from the 1986-87 figure. The percentage of all Arkansas doctorates in the field of Education was 32% in 1987-88, a slight increase over the previous year. Figure 11 shows the trend since 1983-84 in the proportion of doctorates earned in Education for the state.

The general importance of the Education field for Arkansas higher education is illustrated in Figure 12 for 1987-88; each pie chart presents Education degrees as a proportion of all degrees granted for the three degree levels.

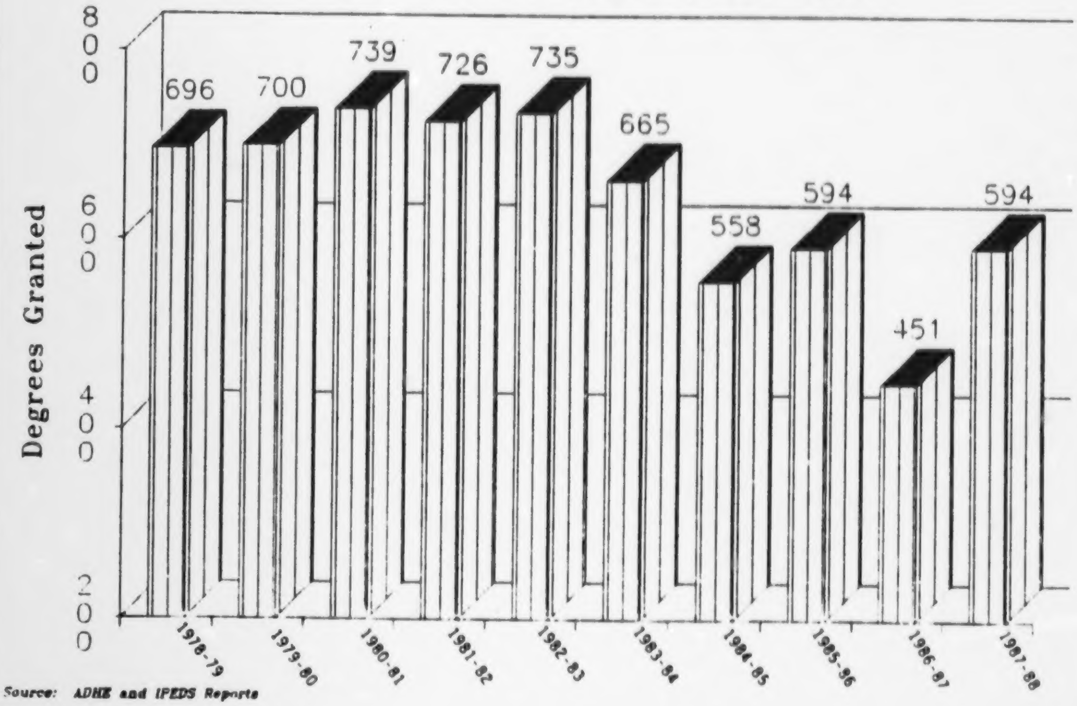
FIGURE 14. BACHELOR'S DEGREES GRANTED BY ARKANSAS PUBLIC UNIVERSITIES TO BLACK STUDENTS, 1979-1988



Source: ADHE and IPEDS Reports

DEGREES GRANTED TO MINORITY STUDENTS

Numerous studies in recent years have looked at expected changes in the workforce and the educational preparation needed to be competitive or successful. Among the topics addressed in these reports is minority participation in higher education. While high school graduation rates for minority Americans are increasing, it appears that proportionately fewer black high school graduates go on to college.

For example, the National Center for Education Statistics reports in **1988 Education Indicators** that black high school completion rates for those who are 20-24 years of age have risen to 81% by 1986, compared with 72% in 1974. At the same time, however, the higher education participation rate for 18-24 year old blacks declined from 23% in 1976 to 22% in 1986. What follows in this section is an analysis of degree-granting trends in Arkansas and the nation with respect to minority students. As the text and accompanying charts indicate, fewer black students are graduating from American universities now than in the 1970s, a trend which also affects Arkansas.

1. Baccalaureate Degrees Awarded to Black Students

Data reported to the Department of Higher Education shows that 10.5% of all bachelor's degrees awarded in 1987-88 by Arkansas public universities were received by black students. This figure represents an increase of 2.2% from 1986-87, a change which reflects the fact that 143 more black students earned bachelor's degrees in 1987-88 than was true the previous year.

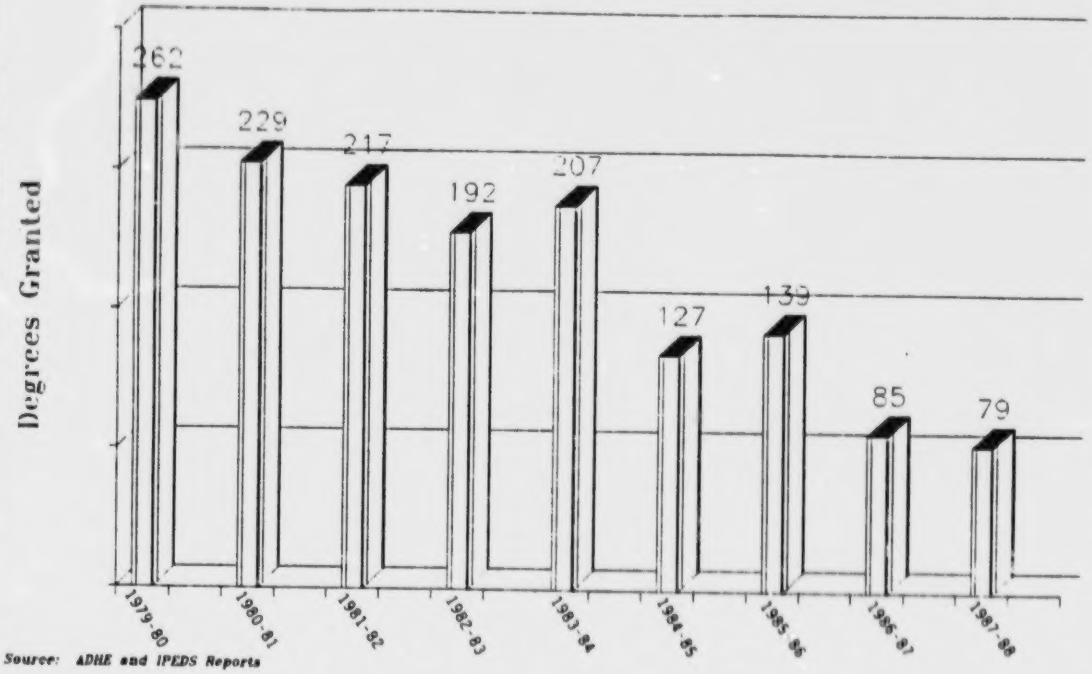
Over the longer term, however, Figure 13 indicates that the proportion of bachelor's degrees going to black graduates of Arkansas public universities has dropped from 13.2% in 1978-79 to the 10.5% of 1987-88. In absolute terms, 100 fewer black students received bachelor's degrees in 1987-88 than in 1978-79. This change has occurred despite an increase in total baccalaureate awards over the same period.

TABLE 20. Total Bachelor's Degrees Awarded in the U.S.

	1976-77	1980-81	1984-85
Total Bachelor's Degrees	917,900	934,800	968,311
Bachelor's Degrees Awarded to Black Students	58,636	60,673	57,473
Percent Received By Black Graduates	6.4%	6.5%	5.9%

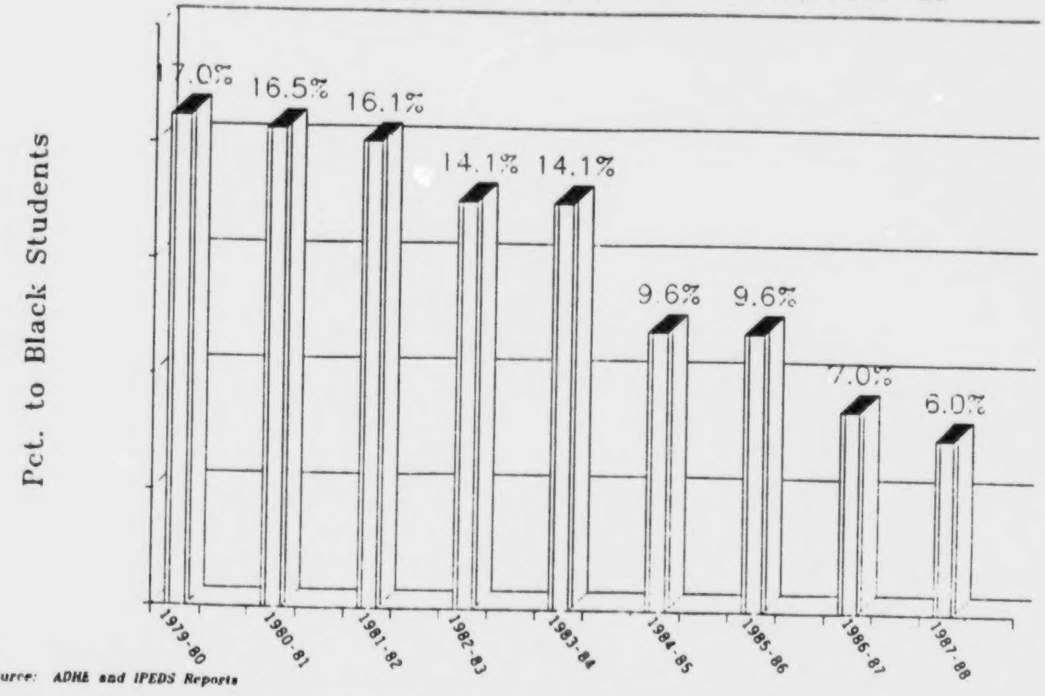
Arkansas mirrors the national trend in this regard, with the principal difference being that a greater percentage of Arkansas bachelor's degrees have been awarded to black graduates. For instance, the table on this page shows that 6.5% of all bachelor's degree awards in the nation went to black students in 1980-81, half the proportion for Arkansas in the same year. Over time, the

FIGURE 15. BACHELOR'S DEGREES IN EDUCATION GRANTED BY ARK. PUBLIC UNIVERSITIES TO BLACK STUDENTS, 1980-88



Source: ADHE and IPEDS Reports

FIGURE 16. PCT. OF EDUCATION BACHELOR'S DEGREES GRANTED BY ARK. PUBLIC UNIVERSITIES TO BLACK STUDENTS, 1980-88



Source: ADHE and IPEDS Reports

national trend has included declines in both the number of bachelor degree awards to black students and in the percentage of degrees received by minority students. As with Arkansas, these changes have taken place against the backdrop of continued growth in total baccalaureate degrees. The national data for these comparisons is taken from the **1988 Digest of Education Statistics**, and 1984-85 is the most recent year covered in this report.

Although there has been a good deal of discussion and debate about the reasons for these changes, no consensus has yet emerged on the causes of declining numbers of black college graduates. Financial aid constraints are a problem, including the growing tendency of student aid awards to be in the form of loans. Evidence from several studies indicates that the prospect of borrowing comparatively large sums of money for college costs deters low-income students from attending institutions of higher education.

Whatever the reasons may turn out to be, the national data highlight a disturbing trend: although total bachelor's degrees in this country rose by almost 34,000 between 1981 and 1985, awards to black students dropped by 3,000 in the same period. Continuation of this pattern will only widen the gap between blacks and other Americans with respect to educational attainment.

2. Degrees Granted in Education

A related concern has been the number of minority teachers produced each year by colleges and universities. The Southern Regional Education Board reported in April 1989 that minority public school enrollment is growing across the region, even as the percent of minority teachers has declined. Closing this gap will require significantly more growth in the number of black teacher education graduates than is currently taking place.

The regional pattern identified by SREB also exists here in Arkansas. While more than 25% of the state's public school students are black, minority teachers represent only about 14% of the total. The question for the future is whether the production of new black teacher education graduates is contributing to a solution.

Review of recent degree-granting trends indicates that the answer is no: since 1980, the number of black teacher education graduates from Arkansas public colleges and universities has declined from 262 to 79 in 1987-88. Moreover, the black proportion of all education degree recipients has dropped over the same period, from 17.0% to 6%. Figures 15 and 16 illustrate these changes. If this trend continues, the gap between students and teachers in minority representation will widen considerably as teachers now in the workforce retire or leave the classroom for other jobs.

TABLE 21. Bachelor's Degrees in Education in the U.S.

	1976-77	1980-81	1984-85
Total Bachelor's Degrees in Education	143,462	108,265	87,788
Education Bachelor's Awards to Blacks	12,922	9,494	5,456
Percent of Education Degrees Received by Black Graduates	9.0%	8.8%	6.2%

The trend described for Arkansas is a national problem. In 1977, 9% of all baccalaureate education degrees in the nation were awarded to black students. By 1985, the latest national data indicate, only 6.2% of education bachelor's degrees went to black graduates. Of equal concern is the precipitous drop in the number of education degrees received by blacks. From 12,922 in 1977, this figure dropped steadily to 5,456 in 1985, a decline of 58% in less than ten years. The decline in Arkansas over the last decade, from 268 to 79, represents a drop of 70%. National data discussed in this section is drawn from the two federal publications cited in the previous section.

As with other changes in higher education degree patterns, the reasons for the decline are complex. On the positive side, significant growth has taken place during this period in the number of black college graduates obtaining degrees in business and management, computer science, the health professions, and engineering. At the other end of the spectrum, the decline in minority education degrees reflects the general minority decrease in all degree fields. In addition, student financial aid considerations also affect the decision to major in a field where graduates earn relatively low salaries. The federal Center for Education Statistics has reported that the average salary for education graduates is the lowest of any field surveyed. Another study indicates that monthly income for bachelor's degree recipients in education is 30% lower than the average for all bachelor's degree graduates.

Borrowing large amounts of money to earn a degree in a low-paying field is a disincentive for most students, and the total number of education graduates in the nation dropped 39% between 1977 and 1985. Arkansas has attempted to address this problem through two innovative financial aid programs proposed by Governor Clinton and endorsed by the 1989 General Assembly. Both would provide loans to minority students who major in teacher education at any Arkansas college or university. Through service in Arkansas as a classroom teacher, loan recipients would have their debt forgiven. While both programs passed and were signed into law by the Governor, there is insufficient money available at the present time to fund them. SREB has urged that these and other steps be taken across the region to increase the number and proportion of minority teachers.

APPENDIX A

DEGREES GRANTED AND OTHER FORMAL AWARDS CONFERRED BY ARKANSAS PUBLIC COLLEGES AND UNIVERSITIES, 1983-84 THROUGH 1987-88

TABLE A-1. CERTIFICATES CONFERRED BY ARKANSAS PUBLIC TWO-YEAR INSTITUTIONS FROM 1983-84 THROUGH 1987-88

Inst.	CIP Code	CIP Classification	1983-84	1984-85	1985-86	1986-87	1987-88

APPENDIX C

GLOSSARY

APPENDIX C: GLOSSARY

TYPES OF DEGREES - Nine major types of earned degrees are awarded annually by Arkansas colleges and universities. For the purposes of this report, the following mutually exclusive degree categories are considered:

1. POSTSECONDARY CERTIFICATE OR DIPLOMA - The majority of certificates are awarded by the two-year state-supported and independent schools. Typically designed for completion in less than two academic years, most certificate programs are offered in specialized areas including business and commerce, data processing, health and public services, and mechanical or natural science technologies.

2. ASSOCIATE DEGREE - An associate degree is granted following completion of an academic program of at least two years but less than the four years required by traditional baccalaureate programs. These degrees may be either terminal or preparatory for further postsecondary study.

3. BACCALAUREATE DEGREE - Baccalaureate degrees are earned after completion of a specific academic program of a minimum of four years.

4. POSTBACCALAUREATE CERTIFICATE - A one- or two-year certificate awarded for the completion of a program which requires a baccalaureate degree for entry.

5. MASTER'S DEGREE - In liberal arts and sciences, masters degrees are customarily awarded upon completion of one to two years of academic work at the post-baccalaureate level. In professional fields such as law and medicine, the master's degree is an advanced degree usually earned after completion of a first professional degree.

6. SPECIALIST DEGREE OR CERTIFICATE - Specialist degrees, commonly in the field of education, are a type of intermediate degree earned between completion of the master's and doctoral degree.

7. INTERMEDIATE DEGREE - Other intermediate degrees are awarded as recognition for a program intermediate between master's and doctoral degrees. In essence, the intermediate degree is a doctoral degree without a dissertation.

8. DOCTORAL DEGREE - Reported independently of first professional degrees, doctorals are regarded as the terminal degree in a profession or academic discipline. An average of three years of graduate work and publication of a formal dissertation are common requirements for this type of degree.

9. FIRST PROFESSIONAL DEGREE - These degrees require a minimum of six years of postsecondary academic study, including two years of college work completed prior to admission to the program. First professional degrees are awarded in three fields in the State of Arkansas (i.e. law, medicine and pharmacy) and must be completed before establishing a practice in these professions. It should be noted that the University of Arkansas Medical Sciences Campus (UAMS) also offers both a bachelor's program in pharmacy and a D.Phar. that qualify graduates for licensure, but only the D.Phar. is considered a first professional degree.
